The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-6, 9, and 10, are rejected under 35 U.S.C. 102(a) as being anticipated by Yamamoto et al (US 2003/0148136 A1).

Yamamoto et al discloses an electronic component made from primarily organic material, comprising a substrate, at least one organic metal electrode, in which the at least one electrode is made from conductive material and applied to a supporting surface, the surface of which is modified and/or roughened by a pulsed laser treatment in a roll-to-roll process (Abstract, Paragraphs 0036, 0037, 0051, 0052, and 0058, and claims 14-16). Yamamoto et al discloses an electronic component in which at least one organic metal electrode is arranged in a depression of a lower layer, wherein the depression has been produced by means of a pulsed laser, having steep walls, sharp contours and a rough bottom surface (Abstract, Figures 1, Paragraphs 0036 and 0037, and 4, and claims 14-16).

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
